

Assignment 09

Creating a Job Application form using Form & Inputs

Reference URL - <https://wscubetech.co/Assignments/Assignment-09/>

Task:

Your task is to create a job application form using HTML <form> and various input elements to collect information from potential candidates. Make sure everything looks neat and well-organised.

Requirements:

1. Design a job application form that collects the following information:
 - First Name (input box)
 - Last Name (input box)
 - Gender (radio button)
 - Mobile Number (input box)
 - Email (input box)
 - DOB (date picker)
 - Qualification (check box)
 - State (dropdown)
 - Address (textarea)
 - Upload Image (input file)
2. Apply basic validation to ensure that all required fields are filled before submission.
3. Add styling to make the form visually appealing and user-friendly.
4. Feel free to add extra features or fields to the form based on your creativity and understanding.

Instructions:

1. Ensure that your HTML file is well-structured and includes appropriate comments for clarity.

If you have any questions or need clarification on any aspect of the assignment or instructions, feel free to ask for assistance.

Happy coding!
